DeCrises

EU Decarbonisation in Times of Crises: Exploring Social Innovations and Enhancing an Equitable Twin Transition

decrises.eu

Background

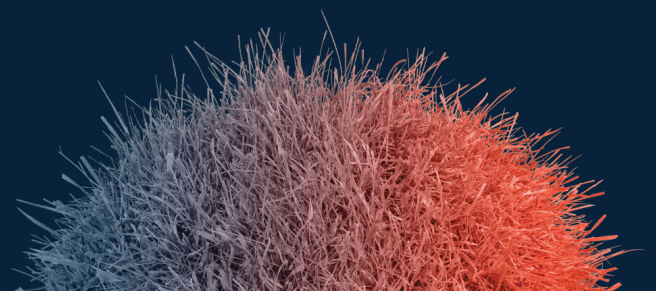

The DeCrises project emerges in response to the European Union's commitment to achieving carbon neutrality by 2050, amid growing complexities from global crises such as the COVID-19 pandemic and geopolitical tensions.

Mission

In the next 3 years, the project will examine different aspects of multilevel governance for a more inclusive, democratic approach to the EU's green and digital twin transitions by improving multi-level governance and empowering community-led social innovations.

Vision

Through research findings and practical policy recommendations, DeCrises aims to address the need for a more inclusive, democratic approach to the EU's green and digital twin transitions.

Objectives

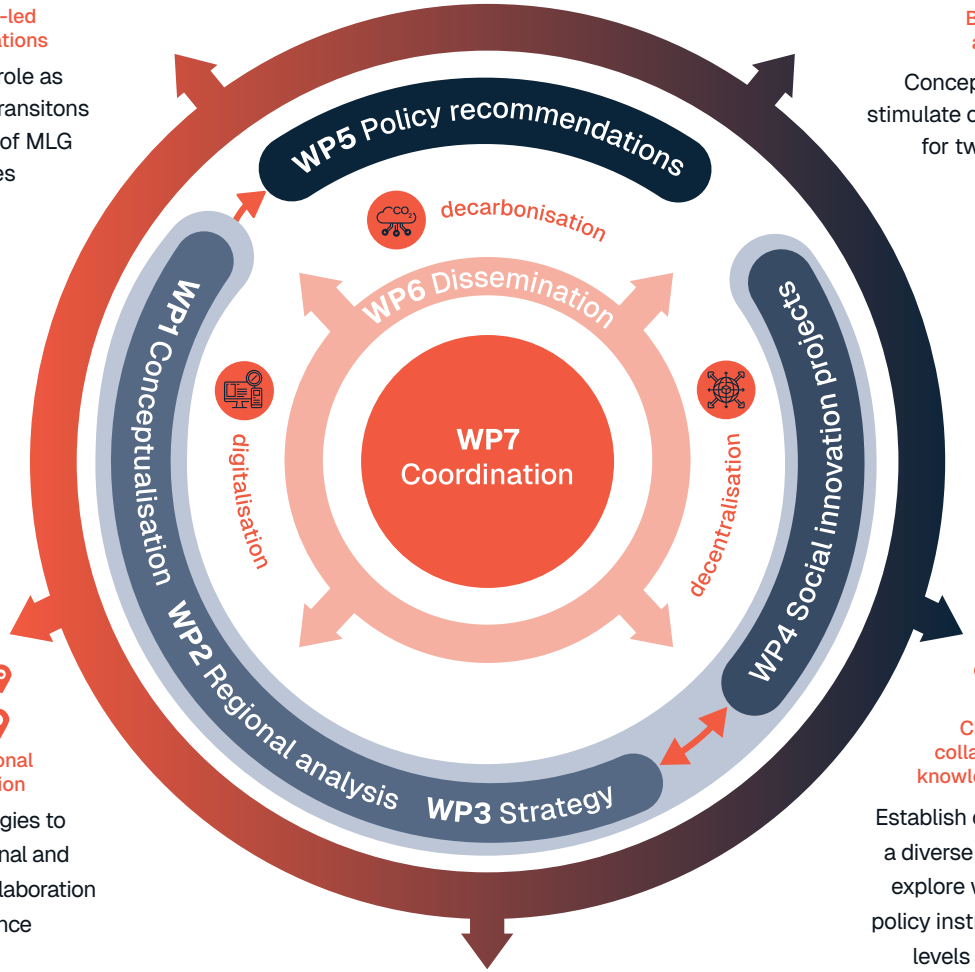

Funded by the European Union

Community-led social innovations

Explain their role as drivers of twin transitons in the context of MLG processes

Bottom-up approach

Conceptualize MLG to stimulate citizen participation for twin transitions

Cross-regional collaboration

Identify strategies to enhance regional and intra-regional collaboration and resilience

Channels of collaboration and knowledge exchange

Establish channels between a diverse set of actors and explore ways to enhance policy instruments at various levels of governance

Decision-making

Translate just twin transition across all levels of governance
